Cord Blood Uses

VIACORD®
From PerkinElmer

over 400 families have used their banked cord blood in transplant or regenerative medicine research.[1]

FOR CURRENT TREATMENTS*- *All transplant recipients were conditioned with chemotherapy/radiation prior to treatment*

This is intended for educational/marketing purposes only and should not be used or interpreted as information on treatments or diagnoses.
*Banking cord blood does not guarantee that treatment will work and only a doctor can determine when it can be used.
**The recipient age and time stored have been rounded to the nearest whole number.
***Cord blood research to treat these conditions is experimental. These diseases are currently not considered treatable with cord blood and may never be considered effective in treating such conditions.
